

MOHAMMAD ABDULLA

SOFTWARE ENGINEER

Profile

I'm a versatile **Software Engineer and an AWS Solutions Architect** who worked in healthcare systems and smart shopping carts. With a knack for problem-solving and a passion for innovation, I thrive in dynamic environments. I excel in developing secure, scalable software solutions and architecting cloud-based architectures on AWS. My strong communication skills and commitment to continuous learning drive me to deliver impactful results and stay ahead in the ever-evolving tech landscape.

Experience

- 2023 - Present

Wowly
Software Engineer, Amman
WOWLY is an amazon-go like project, where the customers in the shopping malls can start and finish shopping on the trolley including checkout, i built a complete smart POS solution, going from admin panel & multi level permissions/roles & dashboards, to the pos system on the cart & Visa machine integration & data synchronization to github actions and CICD's and building a complete reliable & scalable AWS infrastructure.
- 2020 - 2023

Nixpend
Software Engineer, Amman
In Nixpend i worked on building a healthcare app integrated with ERP system to manage all patients & practitioners procedures & insurance & accounting.

Interests

Kali Linux & Penetration Testing

I'm not a PenTester nor a kali linux wizard, but I'm really interested in professionally exploiting vulnerabilities of a computer system.

Skills

Frontend

Angular
CSS frameworks (bootstrap/tailwind)
React

Backend

Nodejs/Express
Nosql (Mongo)
SQL(mysql/postgresql)
ORM (SEQUELIZE)

Cloud

AWS Solutions Architect

Linux & Containerization

Worked on setting up sql databases and managing containerized applications using docker on linux
